

MRC London Institute of Medical Sciences (LMS)

CONSTRUCTION UPDATE

The “soft start” works on site are continuing with making safe the existing hoarding, site clearance and fitting out of the mobile laboratory for Aurora ready for the Cyclotron removal.

Negotiations are continuing with various parties regarding preparing for the next phase of Planning Approval from the GLA and issuing of documentation required from the LBHF Planning Conditions. We are also currently liaising with Ark Burlington Danes Academy and Linford Christie Stadium in preparation to gain access into their areas to set up the site welfare and temporary road.

In the next reporting period it is proposed that these enabling works with no planning constraints will commence, particularly the diversion of the existing drainage to the Trust sides of the site boundary, including taking down a section of the old hoarding and replacing with herras fencing.

The standby generator currently situated on site is due for removal week commencing 5th August, enabling us to arrange for further storage containers to be temporarily relocated onto the site.

WORKING HOURS

Monday to Friday 8am to 6pm. Saturday and Sunday no works without prior approval from the appropriate stakeholders. Deliveries, where possible will generally be scheduled to avoid the peak traffic periods from 8am - 9am and 4pm - 5pm.

CONSIDERATE

CONTRACTORS SCHEME

The MRC LMS project site is registered with the Considerate Constructors Scheme, which is an industry initiative set up to improve the image of construction. The scheme implements a code of considerate practice designed to encourage best practice beyond statutory requirements.
