

## MRC London Institute of Medical Sciences (LMS)

### CONSTRUCTION UPDATE

Not surprisingly, we have had a slower week this week due to the extremely low temperatures which have delayed a couple of the 8th floor concrete pours. However, preparation of the reinforcement for them has continued and with warmer temperatures forecast for next week we should recoup the lost time and complete the final pours by the end of February, ready for the roof steelwork to commence in March.

Internally works are continuing on all floors. The main plantroom on the ground floor is primarily services with ductwork, sprinkler pipework and electrical first fix support work ongoing. On the 1st and 2nd floor, partition studwork is continuing fixed whilst floor screeding is complete to the 2nd and will recommence to the 3rd floor next week once the temperatures increase.

The scaffold and monoflex sheeting is up to the 5th and 6th floors of the facades, with the cladding support framework now being fitted on 4th floors and glazing to the windows being installed on the 1st floor.

In the next phase we will be have completed the slab installation of the 8th floor and will be forming lift overruns and staircores. Services will continue up the risers and plantrooms whilst the screeding, laboratory partition studwork and façade boarding will also continue onto the next floors.

# WE'RE TAKING ON THE THREE PEAKS CHALLENGE

## CHARITY UPDATE

On May 8th 2021 three members of the site team, Alex Clark, Jack Duggan and Robbie Higgins, will be taking on the Three Peaks Challenge for The Pituitary Foundation.

The Pituitary Foundation is an organisation dedicated to providing information and support to newly diagnosed patients and those living with pituitary disorders.

The MRC LMS Project Director, Stuart Yates, was diagnosed with Hypopituitarism at the end of 2019. The Pituitary Foundation has been a fantastic support to Stuart and his family in coming to terms with his new diagnosis. It was, therefore, an easy decision for Stuart and his Walter Lilly project colleagues to commit to raising £10,000 during the course of 2020 for this fantastic charity.

Collectively, over £4,000 has already been raised and now Alex, Jack and Robbie want to boost the fundraising by taking on the Three Peaks Challenge.

[› Click Here to donate to the Team Challenge!](#)

The Pituitary Foundation is a small charity and income has been decimated as a result of COVID-19. They receive no Government funding and are totally reliant on the fundraising efforts of the general public, efforts that have obviously dried up over the past year. If you can donate then it would be hugely appreciated by us, Walter Lilly, and massively appreciated by The Pituitary Foundation.

Every penny makes a vital difference to their work.

Donating through JustGiving is simple, fast and totally secure. Your details are safe with JustGiving - they'll never sell them on or send unwanted emails. Once you donate, they'll send your money directly to the charity. So it's the most efficient way to donate - saving time and cutting costs for the charity.

Please note JustGiving has defaulted the event date as 24th January which was the date we created the page. That is NOT the date of the challenge.

## CONTACT US

Please contact the site team should you have any questions regarding the works.
